cybernetics simulation and conflict pdf

A simulation is an imitation of the operation of a real-world process or system. The act of simulating something first requires that a model be developed; this model represents the key characteristics, behaviors and functions of the selected physical or abstract system or process. The model represents the system itself, whereas the simulation represents the operation of the system over time.

Gordon Pask, Wiener Medalist, worked all his life with charm and great care to bring Cybernetics into the mainstream. Dr Bernard Scott reviews the early work leading to the kinematic Conversation Theory. Scott was instrumental in the seventies in developing CASTE and Thoughtsticker at System Research Ltd, Pask's consulting company which he described as an Epistemological Laboratory.
