Play and the Hundred Languages of Children An Interview

How can we learn what children and adults want and need in playgrounds? And how can we make sure that those playgrounds are a vital public space? These questions were front and center when I participated in a recent review for students in a graduate program for landscape architects. The focus of ...

The science of brain development is providing concrete evidence that there is real power in play. While often dismissed as "just fun," play is the vital activity that children use to learn about and interact with their world, and gain the mental, physical and social skills necessary to succeed in their adult lives.

The Power of Play | Boston Children's Museum

In young children, play is frequently associated with cognitive development and socialization. Play that promotes learning and recreation often incorporates toys, props, tools or other playmates. Play can consist of an amusing, pretend or imaginary activity alone or with another.
