Die cutting is the general process of using a die to shear webs of low-strength materials, such as rubber, fiber, foil, cloth, paper, corrugated fiberboard, paperboard, plastics, pressure-sensitive adhesive tapes, foam and sheet metal. In the metalworking and leather industries, the process is known as clicking and the machine may be referred to as a clicking machine.

Die cutting (web) - Wikipedia

Employment outlook for occupations requiring an associateâ€™s degree, certificate, or some college. Plenty of occupations require more education than a high school diploma but less than a bachelorâ€™s degree.

The Nios Å® II Software Developerâ€™s Handbook assumes you have a basic familiarity with embedded processor concepts. You do not need to be familiar with any specific Intel FPGA technology or with Intel FPGA development tools. Familiarity with Intel FPGA hardware development tools can give you a deeper understanding of the reasoning behind the Nios Å® II software development environment.

Even bad code can function. But if code isnâ€™t clean, it can bring a development organization to its knees.

Every year, countless hours and significant resources are lost because of poorly written code.

Clean Code: A Handbook of Agile Software Craftsmanship

Fundamentals of Engineering Electronics, William Dow, 1937, 617 pages - Courtesy of an anonymous donor. A very unassuming title for a 617-page engineering book! The first part of the book has a rather in-depth treatment of vacuum tube operation, and details of amplifier circuit design.

Design rule checking or check(s) (DRC) is the area of electronic design automation that determines whether the physical layout of a particular chip layout satisfies a series of recommended parameters called design rules. Design rule checking is a major step during physical verification signoff on the design, which also involves LVS (layout versus schematic) check, XOR checks, ERC (electrical ...
