In chemistry, nuclear physics, and particle physics, inelastic scattering is a fundamental scattering process in which the kinetic energy of an incident particle is not conserved (in contrast to elastic scattering). In an inelastic scattering process, some of the energy of the incident particle is lost or increased. Although the term is historically related to the concept of inelastic collision ...

A two-port network (a kind of four-terminal network or quadripole) is an electrical network or device with two pairs of terminals to connect to external circuits. Two terminals constitute a port if the currents applied to them satisfy the essential requirement known as the port condition: the electric current entering one terminal must equal the current emerging from the other terminal on the ...

The respective source values are indicated by a star. Conversion between different units performed by using Spectroscopic Unit Converter. In order to avoid any confusion, the above values in cm^{-1} correspond to the so-called wavenumber $=1/\lambda$, i.e. a direct inverse of the wavelength without 2π prefactor. The above values in Hz correspond to the ordinary frequency, i.e. not to the radial ...

Superconductor Terminology and the Naming Scheme. Anneal: To heat and then slowly cool a material to reduce brittleness. Annealing of ceramic superconductors usually follows sintering and is done in an oxygen-rich atmosphere to restore oxygen lost during sintering.

1.. Introduction There have been numerous published reviews in recent years on the subject of tunneling time , , , , , , , , . Indeed, this journal published one such review less than 2 years ago . Given the profusion and currency of reviews on the subject, one might question the need for yet another one so soon.

Tunneling time, the Hartman effect, and superluminality: A

The texture-related shape anisotropy of cup drawn metallic sheet parts is referred to as earing or ear formation. It is a characteristic phenomenon associated with the crystallographic texture and the resulting elastic-plastic anisotropy of metals.
