

distributed control systems pdf

In software development, distributed version control (also known as distributed revision control) is a form of version control where the complete codebase - including its full history - is mirrored on every developer's computer. This allows branching and merging to be managed automatically, increases speeds of most operations (except for pushing and pulling), improves the ability to work ...

Distributed version control - Wikipedia

A distributed control system (DCS) is a computerised control system for a process or plant usually with a large number of control loops, in which autonomous controllers are distributed throughout the system, but there is central operator supervisory control. This is in contrast to systems that use centralized controllers; either discrete controllers located at a central control room or within a ...

Distributed Embedded Systems (CCS Labs) Welcome to CCS Labs at Paderborn University. The acronym CCS stands for Computer and Communication Systems, indicating our main research interest.

Distributed Embedded Systems (CCS Labs)

I am a member of the Data Management, Exploration and Mining group in Microsoft Research Redmond. I work on various aspects database systems, mostly related to data integration and transaction processing. Currently, I'm working on a distributed systems programming framework, called Orleans, which was released as open source in January, 2015 and is widely used inside and outside Microsoft.
