The persistent gap between female and male labour force participation comes at a significant economic cost. This column argues that because women and men complement each other in the production process, the economic benefits from gender diversity are likely to be larger than suggested by previous studies.

Overview. An economic impact analysis attempts to measure or estimate the change in economic activity in a specified region, caused by a specific business, organization, policy, program, project, activity, or other economic event. The study region can be a neighborhood, town, city, county, statistical area, state, country, continent, or the entire globe.
