Human immunodeficiency virus infection and acquired immune deficiency syndrome (HIV/AIDS) is a spectrum of conditions caused by infection with the human immunodeficiency virus (HIV). Following initial infection, a person may not notice any symptoms or may experience a brief period of influenza-like illness. Typically, this is followed by a prolonged period with no symptoms.

Each day Federal agencies publish documents in the Federal Register, including proposed rules, final rules, public notices, and Presidential actions. The print-based, official format of the Federal Register displays information in a dense format (3-column PDF) that makes it difficult to read and to process regulatory data in meaningful and innovative ways.

At the World Bank, an internal study found what South African economist Alan Whiteside ridiculed as a silver lining in the plague.. If the only effect of the AIDS epidemic were to reduce the population growth rate, it would increase the growth rate of per capita income in any plausible economic model, said the June 1992 report by the bank's population and human resources department.
